E-Z-ON® Bus Tether Mount for School Buses

LAP BELT REQUIRED:

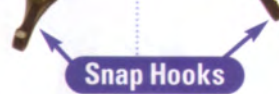

The E-Z-ON® Bus Tether Mount is required for the E-Z-ON® 225 Vest and can be used on any E-Z-ON® vest on school bus seats with seat belts.

Thread the lap belt through the E-Z-ON® vest belt loops. Snap hooks are attached to the vest. The tether hook attaches to the bus tether anchor.

Install the E-Z-ON® tether bracket to the existing seat belt hardware. See picture below.

Adjust by pulling the web end through the tilt-lock adjuster. The vest should fit the passenger snug and the tether adjusted without slack.

- The E-Z-ON® Bus Tether Mount can secure passengers weighing 20-168 lbs. (225 vest 20-80lbs.). Use the E-Z-ON® tether bracket to anchor to the bus frame up to 168 lbs.
- Snap hooks simply clip on to the vest shoulder D-rings or metal slots on adjustable vests.
- A vehicle belt **MUST** be used with the E-Z-ON® Bus Tether Mount unless using 225 vest as shown. The E-Z-ON® Bus Tether Mount secures the upper body.
- The lap belt secures the lower body.

Tether attaches under bus seat, using seat belt hardware or E-Z-ON® hardware

Tether bracket (swivel) included

Lift up on tilt-lock to adjust tether
