180-080A	Pair, Black Base & Arms w/ htd mirror
180-090A	Pair, Black Base, Stainless Arms w/ non-htd mirror
180-200A	Pair, Black Base, Stainless Arms, w/ Htd. mirror
185-070A	Pair, Yellow Base & Black Arms, w/ non-htd mirror
185-080A	Pair, Yellow Base & Black Arms, w/ htd mirror
185-090A	Pair, Yellow Base, Stainless Arms, w/ non-htd mirror
185-200A	Pair, Yellow Base, Stainless Arms, w/ htd mirror

The IC mount's base features a built-in visor that effectively prevents headlamp glare from reflecting in the crossview mirrors.

In recent years bus designers have incorporated longer, sloping hood styles. While this has in some cases improved forward visibility, it has also introduced the problem of headlamp glare reflecting in the crossview mirrors. To address this challenge, Mirror Lite has developed a highly stable mounting system for IC vehicles that features a built-in light visor, effectively protecting drivers eyes from dangerous glare.

Available in Black or Yellow
